

Kentucky State List of Birds

Kentucky Bird Records Committee (KBRC)

December 2017

The **KY** column estimates the difficulty of finding the species in a typical year in Kentucky. **Review List species have a KY code of 4 or 5 and are shown in bold.** Species not listed here, listed as hypothetical or KY 6 (extinct/extirpated), or observed at very atypical locations or dates also require review. Species with a KY code from 1-3 do not require KBRC review.

We encourage birders to quickly alert others of interesting observations, especially of species with a KY code of 3 or higher. We also encourage birders to submit species counts to [eBird](http://eBird.org).

Heavy lines separate orders; dashed lines separate families within an order. Based on [Fifty-eighth Supplement to the American Ornithological Society's Check-list of North American Birds](#).

Updates and additional information about birding in Kentucky available from
